

RGCS Engineering Build Sheet — Phyrll Generator Holder

Design PHY-BASIC-001 · source specimen CRY-NODES-001

Dimensions (derived)

base thickness mm	4
cavity depth mm	16.4
cavity length mm	110.8
cavity width mm	32.8
outer height mm	20.4
outer length mm	116.8
outer width mm	38.8
wall thickness mm	3
coil channel width (mm)	2
coil channel depth (mm)	1.5

Print settings

material	PLA
nozzle (°C)	210
bed (°C)	60
layer height (mm)	0.2
infill	30%
perimeter walls	3

Generated files

SCAD	phyrll_generator_demo.scad
------	----------------------------

Measurement plan

Verify cavity fit against the physical specimen before winding coils; record actual clearances beside the design values.

Claim boundary

This build sheet is an engineering plan and reproducibility record. Predictions are model outputs. Measurements decide.
