

# RGCS Engineering Sheet — Annular Ring Prototype

Design RING-37-001 · 37 cells

## Ring geometry (derived, closes exactly)

|                     |                |
|---------------------|----------------|
| design ID           | RING-37-001    |
| outer diameter (mm) | 288            |
| inner diameter (mm) | 188            |
| annulus width (mm)  | 50             |
| cell count          | 37             |
| cell span (deg)     | 9.72973        |
| active cells        | 33             |
| blanked cells       | 33, 34, 35, 36 |
| material            | FR4            |

## Probe plan

| probe | cell |
|-------|------|
| P1    | 0    |
| P2    | 9    |
| P3    | 18   |

## Sideband table (base 4096 Hz ± n · 925 Hz)

| order | lower (Hz) | upper (Hz) |
|-------|------------|------------|
| 1     | 3171       | 5021       |
| 2     | 2246       | 5946       |
| 3     | 1321       | 6871       |

## Claim boundary

This annular ring design records geometry, masks, phase tables, probe layouts, and model outputs. It is not evidence of physical performance until measured.
