

control classes per experimental branch (CONTROL_MATRIX v1.0.0)

	instrument- only	no-specimen / dummy load	matched specimen	matched off- frequency	sham (zero drive)	positive injection	randomised blinded	sensor swap / reposition
1 modal survey	required	gates any claim (required before claim)	gates any claim (required before claim)	not applicable	not applicable	required	required	required
2 electrode pulse	gates any claim (required before claim)	gates any claim (required before claim)	required	not applicable	gates any claim (required before claim)	gates any claim (required before claim)	required	not applicable
3 sound key	gates any claim (required before claim)	gates any claim (required before claim)	not applicable	gates any claim (required before claim)	gates any claim (required before claim)	gates any claim (required before claim)	required	not applicable
4 opposed coil	gates any claim (required before claim)	gates any claim (required before claim)	required	not applicable	required	gates any claim (required before claim)	required	not applicable
5 human loading	required	gates any claim (required before claim)	required	not applicable	required	gates any claim (required before claim)	required	not applicable
6 spiral cone	required	gates any claim (required before claim)	gates any claim (required before claim)	not applicable	not applicable	required	required	not applicable
7 water (exploratory)	required	gates any claim (required before claim)	not applicable	not applicable	gates any claim (required before claim)	gates any claim (required before claim)	required	not applicable
8 spatial mapping	gates any claim (required before claim)	required	not applicable	not applicable	required	gates any claim (required before claim)	required	gates any claim (required before claim)
